Core NII represents GAAP NII adjusted for differences in applicable cash distributions received on our CLO equity investments relative to income recognized in accordance with GAAP. OFS Capital Management, LLC, our investment adviser, uses this information in its internal analysis of results and believes that this information may be informative in gauging the quality of the Company's financial performance, identifying trends in its results, and providing meaningful period-to-period comparisons.

Income from investments in the "equity" class securities of CLO vehicles, for GAAP purposes, is recorded using the effective interest method; this is based on an effective yield to the expected redemption utilizing estimated cash flows, at current amortized cost, including those CLO equity investments that have not made their inaugural distribution for the relevant period end. The result is an effective yield for the investment in which the respective investment's cost basis is adjusted quarterly based on the difference between the actual cash received, or distributions entitled to be received, and the effective yield calculation. Accordingly, investment income recognized on CLO equity securities in the GAAP statement of operations differs from the cash distributions actually received by the Company during the period (referred to below as "CLO equity adjustments").

Furthermore, in order for the Company to continue to qualify for tax treatment as a regulated investment company, we are required, among other things, to distribute at least 90% of our investment company taxable income annually. Therefore, Core NII may provide a better indication of our estimated taxable income for a reporting period than GAAP NII; we can offer no assurance that will be the case, however, as the ultimate tax character of our earnings cannot be determined until our tax returns are prepared after the close of a fiscal year. We note that this non-GAAP measure may not serve as a useful indicator of taxable earnings, particularly during periods of market disruption and volatility, and, as such, our taxable income may differ materially from our Core NII.
